Some of the inhabitants of North Chicago, peaceable citizens, who have sought a quiet home and pure are near our lake abore, have been sorely perplexed of laie on discovering most neaveous and revolting odders, emanting from a neighborhood hitherto eateemed the perfection of aslubrity and purity. The offending efflowin seemed to culminate one of the hot nights of this hot week, when—all windows opened to catch the lightest zephyr—lo! such excerable smells; as if the congregated impurities of the whole city had concentrated in one deadly blast, filling parior, hall and chamber, and debarring sleep or rest that night. After much busy and fruitless speculation of sufficiers, the myslery was abived. Our vinerable city government, with admirable sagacity and economy, had appropriated its own conspicuous and beautiful grounds on the lake abore, and granted to an individual the precious monopoly of gathering thither the decayed and patrid remains of all the dead animals of the city, from which he is permitted exclusively to tog out the fat and mettions paris—" for the public good."

Messra, Editors, I will make no appeal here to the shades of Hippocrates, of Solomen and other wise men who have lived, but may I not beg our remerable fathers of the city te make a trial of these smells for themselves—cuc, it is believed, would suffice—and to sneb practical test we would cheeffully submit the question: "missance or no Nurance."

ast be said to be as morally certain as any contest is waged, assume more and more the aspect of demonstration, and it would seem as though nothing short of a miracle can change here the leaders of the factions meet to conwith the hope of preventing an election by the people, and thus turn over the whole ext winter. But even this mode of warfi ntatives so confident in the righteour f their cause and of a glorious triumph over ither a divided or an united opposition—tha all the scheming and plotting of the politician bid fair to come to nought before the majest; of a patrictic and unpurchasable people. But while all the omens are thus auspicious

of these latter there are two classes of nom nal Republicans who require close

sought in that inst most beartily sibseribes, and his administra-sion will conform to it in every particular. His whole public life, his speeches delivered prior to his nomination for the Presidency, his letter of acceptance, are all conclusive on this rs more conservative than the Republican creed, mistakes either the man or the creed, or, for some secret reason, desires his defeat, and is instigated by that desire to misrepresent him.

Lot all who come within this category be closely watched.

But still more dangerous are those professed Republicans who falsely represent Mr. Lincoln as a man of extreme views, in sever of revolutionary measures, and of wielding the power of the federal government for the overthrow of slavery in the States where it exists by virtue of State Sovereignty—and they should be even more closely watched than the former class. The Republican party is pre-eminenty a States rights party. It has no aim at varied ance with our national fundamental law, or that would infringe upon the individual covereignty of a single State. They who assert that the Republican party hold that "It is the "duty of the federal government to make the "States all free" or to interfere in any manner with the sovereign rights of the States under the Constitution, knowingly and wiltully misrepresent the party; and they who assert that such is the dectrine of Mr Lincoln, maliciously misreprent him. The doctrine of the Republican party and of Mr. Lincoln, on this subject, is fully and unmistakably set forth in the fourth section of the Chicago Platform; in these words:

That the maintenance inviolate of the Right of each State to ordir and control is come donestic institutions according to the covar judgment exclusions.

ty on this subject; and the acministration of Mr. Lincoln will conform to it both in letter and in spirit. We need not particularise the instances in which the party and Mr. Lincoln have been represented as holding the opposite view. Nor need we say, for the fact is palpable to every fair mind—that the object is to damage Republicanism and to defeat Mr. Lin-coln. Such assertions, confined to the obscure coin. Such assertions, confined to the obscure and uninfluential journals in which they first find expression, could do but little harm. But their authors hope to accomplish their aim by cide of a getting them copied into the N. Y. Herald, and other unacrupulous pro-alavery sheets of large circulation in New York, Pennsylvania and New Jersey, in which the conservative element is large, where the battle for the Presidency has really to be fought, and where the character and intent of the writers are not sufficiently known to act as an antidote to the vile slander. In this way this class of men hope to defeat Mr. Lincoln. Estimated at their true value by the Republican party, utterly powerless to prevert or shape its policy, and shows of all influence with the masses—they would long since have gone getting them copied into the N. Y. Heraid, and other unscrupulous pro-slavery sheets of large circulation in New York, Pennsylvania and New Jersey, in which the conservative element is large, where the battle for the Presidency has really to be fought, and where the character and intent of the writers are not sufficiently known to act as an antidote to the vile slander. In this way this class of men hope to defeat Mr. Lincoln. Estimated at their true value by the Republican party, utterly poweriess to prevert or shape its policy, and shorn of all influence with the masses—they would long since have gone ever to Douglas or Brecktoridge, but for the fact that they are more powerful for mischief while professing to be within the Republican organization than if openly arrayed against it. Again we say, let them be watched.

The fundamental idea of Republicans as to slavery is, that it is a svrong—that it should

any ways, to the formation of such a senti-ent in those States; and that the Federa Government can and will be so admir as to foster its growth and to encoura ose journals which properly reflect the sen-nents of the rank and file. Again we caution all true Republicans against the men and jour cals which make a different representation of the doctrines of the party. They are wolves in sheep's clothing. They desire the destruc-tion of the party and the defeat of Mr. Lincoln.

MORE FILLIBUSTERING. ormed of the progress of events in Central America—of the re-cession of the Bay Islands by Great Britain, to Honduras—of the intention of the inhabitants of these islands to resist the authority of the Honduras governgrey-eyed man of destiny, from New Orleans to Rustan, the principal one of the group, and of his manifest intention to make a des from that point to the main land, in pursuit of the piratical purposes to which his life seems to be devoted. A new act in the fillibustering being forewarned of the intentions of its Rua tan subjects, solicited and got the aid of a sovereignty. The resistants were overawed which has tempered his valor, withdrew with all the ragamuffles under his command, and lound shelter in another and adjacent island comparatively unsettled, about the govern change of flags was effected without dis-turbance; and on the 21st of June Gen. Walker

Taylor sailed from New Orleans with reinforcements and arms for the fillibustering chief, and set out for his place of ultimate destinationwhatever that may be. The New Orlean Delta, the piratical organ which has never failed to end ree any lawless atrocity that Walker might commit, intimates that he will make a descent upon San Juan within the boundaries of Nicaragus, whence, we are forced to believe, he will sally forth to attemp the conquest that he failed to achieve during the last marauding expedition in which he was engaged. Unless Heaven, offended by has sent a tornado to sweep him off the face and of the commencement of the rapine and murder in which he lately bore a conspicuous

part.
It is vain to hope that our government will treat him as a pirate and outlaw. The obedience of Mr. Buchanan to the demands of the South, whence the buccaneer draws his men and money, and the avowed objects of all Walker's expeditions which are to extend the area of human slavery, forbid that. But a large British force is in the waters which his presence makes dangerous, and the chance that he will be overhauled and turned back, attached to the fleet, is so flattering that we have little reason to regret that the expedition set forth. That he may never return to the country which has the doubtful hozor of being his birth place, should be the devout wish all peaceable men, in whose eyes the American Union is not a vast machine for stifling numan liberty and perpetuating human lavery.

EFFECT OF PRINTING. Since we printed Jim Allen's speech at Bloomington, his party friends in the North soiled. The milk is sour. PROGRESS OF THE CAMPAIGN. Letters from the People. THE BALL BOLLING IN SOUTHERN IL

nen never engaged in the grand struggle for iberty and the rights of man than the Republieans of Marion County. The meeting at Cen-tralia on Thursday hast, addressed by Hon. Leonard Swett, witnessed to the surprise of all the increasing strength of the Republican party in the county. And old Salem, that has so long eratic misrule, unfuried the Republican bainer, and with streamers, motions, and transparencies, marched under the soul-thrilling music of fife and drum in a solid delegation, composed of one hundred and wenty live Republicans, for the scene of action. The extreme heat of the day and dust of the roads no impediments were in their way. A like acree had avery occurred in their way. A like scene had never occurred before in our village, and it was amusing to wit-ness the so-called Democracy standing upon the corners of the streets aghest, as the shouts for Lincoln and Hamlin rent the air. On Friday Lincoin and Hamin rent the air. On Friday evening we had another Republican rally at the Court House in Salem, to hear a speech from Prof. W. S. Pope, of Mount Morris Sominary. The young and gifted orator occupied about two and a half hours in a most felling speech upon and a half hours in a most telling speech upon the questions of the day. Marion County is being thoroughly canvaned, and, dairy good, honest citizens who have been hoodwinked by the cry of "Popular Soversignty," now see the callacy, and are flocking around the standard of Republicanism, and to-day, Salem, the County Seat of Marion County, the boasted stronghold of the "unterrified," has a handsome Emphilic of the "unterrified," has a handsome Republi

In the canvass of 1856 the county gave 152 rotes for Fremost. In 1868 it gave 570 for Incoln, and in 1860 Marion County will give 800 votes for the Republican ticket, beyond a doubt, A Mass Republican County Convention is called to meet on the 17th inst., when we shall called to meet on the I'th hast, when we shall nominate candidates for, every county office as well as the Legislature, and will be much disappointed if we don't succeed in the election of some of them.

Traly, the work goes bravely on. Mr. Dong-

We have got the "dead wood" on them in this county, and I can hear nothing from the adjoining counties but the most cheering news. For instance, at Xenia, eighteen miles east of this place, in Clay County, two years ago, but four Republican votes were cast; now they have a Republican Club of one hundred and twenty-eight. This, and similar news we hear all over Southern Illinois and Egypt proper, and a second property of the Republicans are making great efforts for the 17th inst., when the Hon. Richard Yates, and others are to be with us. The Passe and Tarness is largely taken here and is doing a grand work. Free labor, fre homesteads, freemen, and "Honest Old Abe' are our battle cry, and with him we shall surely

riumph. Yours truly, F. S. M. NORTHERN INDIANA. Correspondence of the Press and Tribune | Gosney, Ind., Aug. 8, 1880 Geage, Ind. Auc. 5, 180.

Having seen but little in your paper lately in reference to the progress of the campaign in Northern Indiana, I sak you to devote a small space to a communication from one of your subscribers and most attentive readers. A good deal of seeming apathy has heretofore prevailed among Republicans in this section of the country, owing to the opinion that the election of 'Old Abe'', can be brought about without much effort; but I am happy to say that the people are again becoming aroused and are organizing with the greatest enthusiasm.

The former Republican majorities in the counties north of the Wabash will be fully sustained and in many of them largely increased. The counties of Ekhart, Kosciusko, Steuben, De-

Kalb, LaGrange and Noble will give incre jornues in Whitesy and Allen will be greatly reduced, and probably, in the last, be wiped cut altogether. My own opinion is that every county in this (10th) Congressional District, excepting Allen will go Republican, and our candidate (Hon. Wm. Mitchell) be elected by at least 1,500 majority.

The first rally of the Republicans of Ekhart counts was hald or Saturday. county was held on Saturday last, and a grand affair it was. The notice being short, a large

And what product has the North with which to supply this increased demand? The States which raise a surplus of wheat and export it are Illinois, Indiana, 10-as, Kentacky, Michigan, Missourt, New York, Ohio, Pennsylvania Yieginia, and Wisconsin, in allieleven States, which produced, in 1850, an average vear, 85,500,000 bushes, a valued at about \$90,000,000 But it is said that this year the product will far exceed this. Illinois, which Tasked 9,445 75 bushels to the acre, will produce this year not less than \$5,000,000 bushes. wheat in 1850, at an average of 11 bushels to the sere, will produce this year not less than 25,000,000 bushels. As intelligent farmer writing to a Chicago exchange from the Southern portion of Himois, says of the wheat and corn erops: "If you intend the store the grain that is coming to your city this fail, you must rost Chicago all over, and make one grand storebouse of it." Indiana, hi 1850 produced 6 214, 488 bushels. This year it will exceed 18,000 000. The crop of Outo is sedimated 25 000,000 bush. New York at 20,600,000. Virginia as 15 000,000 bush. New York at 20,600,000. Virginia as 15 000,000 bushels against \$5 000,000. It is estimated that these eleven States will produce 1850,000,000 bushels, at the price paid in St. Louis and Unicago the home markets for the crop, will be worth \$465,000,000.

The corn crop of the West will surpass, it is said, may that has been harrasted any year during the last decade. In 1550 Hilmons, Indiana, any that has been harrasted any year during the last decade. In 1550 Hilmons, Indiana, Kentucky, Missouri, Ohio, Tennessee and Virginia, the corn exporting States, raised 32,000,000. The value of the produce to the entire copo of the Union. And this demand from the South is made simultaneously with a similar call from Europe.

We notice in our Western exchanges several thems in cegard to purchases made by English firms, of houses in the very interior of the States of Idinois and Indians, at high rates.

St. John's (Fla.) Mirror.

The process of manufacturing the water gas from which such excellent results are claimed in Philadelphia, is thus briefly descaibed: The apparatus consists of a bench of tracer retors, which contain charcoal heated to a white heat. Upon the top of this bench of retorts is a reservoir centaining melted rosin, kept liquified by hert generated from the charcoal. Into this reservoir steam is injected, which, minging with the melted rosin, passes into the retort containing the heated charcoal, and the gas is produced. It is then conveyed to a gasometer, and is ready for use.

Will high prices relefer these staples? That we are compelled to leave to our readers to asgue and time to develop. In case of a war in Europe, no duubt such would be the case, and such a war wonid be ruinous to the South. Without a war to stimulate prices we do not think that the cry raised by Eogland and the demand by the South need frighten those who will have to parchase. Soch a crop has not been known for years. As if providentially, to be an expense of the standard of the sealing and a richable current. The rance became exciting, and all on board to be saudy or dear, and there is no need of those fearful and rather ridiculous forebodings of famine we see prountigated in some papers. But no doubt speculators will handle the articles excisively this season, and perhaps to the advancement of—prices enormously. With the small is dick of wheat and corn on hand here, we imagine Nashville men will find money in these articles.
